

Dear LSSI family,

March 18, 2020

As the landscape rapidly changes regarding the COVID-19 virus, please be assured we have been closely monitoring the situation and make all program decisions based on best practice standards as well as continuous information from official sources.

Based on the facts and data we have received over the past week; we have decided to temporarily close operations at Children's Village effective March 23rd through April 10th. Our current plan is to re-open our services beginning April 13, 2020. Please understand the current re-open date of April 13th may change based on updated official information occurring during our time of closure.

To help you keep in informed during this time of closure, LSSI has created a COVID-19 specific webpage: www.lssin.org/covid19 Please bookmark this page and check it frequently for updates of the agency and program specific changes, as well as resources we are using to understand COVID-19. It is our ultimate goal to continue to support families to the best of our ability within the scope of community health.

We are praying for our families, staff, and community during this very difficult time. We are turning our worry into action, taking it step by step, minute by minute, knowing that His love for each one of us is steadfast and never fails.

Regards,

Kathy
